SUMMARY

I'm a software developer with a strong foundation in programming and web development. I enjoy learning and exploring new technologies to enhance my skills. Over time, I have honed my expertise in technologies such as HTML, CSS, JavaScript, React, and Node.js, and I am constantly pushing myself to grow and stay updated with modern development practices.

I'm passionate about building clean, user-friendly, and scalable applications. I enjoy solving real-world problems, collaborating with teams, and continuously improving my craft. With a curious mindset and a dedication to learning, I'm always exploring new tools, frameworks, and best practices to deliver better solutions.

EXPERIENCE

Umbrella Solution (kathmandu,Khusibu)

Software Developer
Dec, 2024 - Present

Umbrella Solution is a dynamic software company that specializes in providing innovative technology solutions to meet the diverse needs of its clients. With expertise in .NET, C#, and React, Umbrella Solution leverages modern technologies to create robust, scalable, and user-friendly software applications. The company focuses on delivering high-quality solutions that drive digital transformation, enhance business operations, and improve user experiences. Working at Umbrella Solution offers valuable exposure to cutting-edge development practices and a collaborative environment where creativity and technical skills thrive.

EDUCATION

National College (Kathmandu)

BCA
Oct, 2020 - Present

A Bachelor in Computer Applications (BCA) is a comprehensive undergraduate program designed to provide students with a solid foundation in computer science and its applications. This degree equips students with the necessary skills in programming, software development, database management, networking, and computer systems. It serves as a stepping stone for those looking to pursue careers in technology, software engineering, data analysis, or IT consulting. With the growing demand for tech professionals, a BCA degree opens up diverse opportunities in the ever-evolving field of information technology.

PROJECTS

HamroNibas

HamroNibas is a cutting-edge Rental Management System built using the MERN stack. I have integrated smart algorithms to enhance property listing management, tenant interactions, and personalized recommendations. By leveraging the power of MongoDB, Express, React, and Node.js, HamroNibas provides a seamless and intuitive platform that simplifies the rental process for both landlords and tenants.

Feel free to visit my GitHub to explore more of my projects.
